

2.4G Gooseneck Microphone

Model No.: KSU-G2B-4

Product introduction

Wireless gooseneck microphone as a professional audio equipment, video meeting with high quality, fashionable appearance, high performance characteristics. A complete set of equipment includes wireless gooseneck microphone and a small USB receiver, the microphone to pick up and send to receiver is in a sound and various interference shielding, upload voice nearly lossless audio output device.

Product features

- 1, high quality, high fidelity, high SNR, low latency, giving users the best sound quality experience;
- 2, high-performance, full range of audio capture minimum 36 hours of continuous use, low power consumption, microphone (two AA batteries);
- 3, small volume, high integration, portable clever a plug and play, abandons the traditional complex equipment connection, easy to use, the real "fool" operation;
- 4, 2.4 G ISM frequency band transmission quality.

Specification

	Wireless Microphone	Receiver
Input Valtage	2.2~3V	4.6~5.5V
Power supply	2 AA Batteries	USB (5V/500mA)
Operating Current	50mA (MAX)	200mA (MAX)
Working hours	>70h	USB
Transmitting Power	3dB(MAX)	5dB(MAX)
Sensitivity	-30dB±3dB	\
Maximum connection	\	1~4
Pick up way	ECM Electret	\
Polar Pattern	Cardioid	\
Operating Temperature	-20°~ 60°	
Frequency Response	60HZ~16kHZ	
S/N	>75dB	
Effective Range	>10M	
Wireless type	2.4G ISM	
Dimension	130mm*110mm*420mm	
Weight	430g
